Summary

As a developer and entrepreneur, I'm ambitious to create and develop products and features. My goal is to deliver a high level of product to the end customer. I always looking to sharpen my coding experience and learn useful tools and technologies. I like working in an agile environment as a team, contribute from my knowledge and learn from my teammates. However, I understand the importance of self-execution and takes full responsibility for my own tasks.

Work Experience

Application Developer at Quality Forward a start-up providing e-QMS solutions, 2019 - present

- Developing both the client and server side of the system, mostly in JavaScript
- Work closely with customers to implement their business and technical requirements, including scripted business rules, automations, events handling, REST based integrations, etc.

Mobile Apps Development Freelance, 2020 - present

End-to-end development of mobile apps, including app design, client and server-side implementation and deployment.

Projects

- Beat-Fit – A mobile app for tracking your personal trainings and nutrition programs. Developed by React-Native, node.js and mongo (source code on Github).
Link to the Play store: <https://play.google.com/store/apps/details?id=com.nirKatz.BeatFit>
- Schedj – A mobile app for scheduling meetings and managing projects between students. Developed by React-Native and Firebase. State management with Redux, push-notifications, multiple users calendar synchronization, etc. (source code on Github).
- Smartest – A web platform for exam checking, 2019 BGU Hackathon winner initiative. Developed by React.js and node.js.
- XSCode-demo – A light demo website built by React.js and deployed by Firebase.
